

Supplemental Fig. S3

Supplemental Fig. S3: Expression profile of *Cav1* and *Cav2* in WT and Cav-1 KO BMDMs.

The mRNA expression of *Cav-1* (*Cav1*, **A**) and *Cav-2* (*Cav2*, **B**) with or without LPS stimulus (1 μ g/mL, 4 h or 24 h) was measured by qPCR between WT and Cav-1 KO BMDMs. Data were obtained from three to four independent isolations. The mRNA expression of *Cav-1* was the same as Fig. 3C (not normalized to LPS (-)). Data were presented as the means \pm SD. Statistical analysis was performed using one-way (**A**) or two-way (**B**) ANOVA followed by Tukey test.
